

Project Homework 1

“Based on the responses you got from the interview, create 3 user personas for your project”

User Persona 1: Essam

1. **Name:** Essam
2. **Age:** 20
3. **Occupation:** University Student
4. **Background:** Essam is a busy student who wants to become more spiritually consistent. He knows prayer times generally but often forgets. He uses TikTok to listen to azkar and reads Quran a lot in Ramadan.
5. **Goals and Needs:** Wants an app that reminds him about prayer and azkar, tracks his Quran reading, and suggests relevant duas to boost his motivation.
6. **Pain Points:** Struggles with forgetfulness, and no motivation. Dislikes having to open apps just to check prayer time.
7. **Technology Proficiency:** Comfortable with mobile apps and social media.
8. **Preferred Platforms:** Mobile apps
9. **Quote:** *“I want something to help me stay consistent, even a small push can make a difference.”*

User Persona 2: Nidal

1. **Name:** Nidal
2. **Age:** 22
3. **Occupation:** Freelancer

4. **Background:** Nidal tries hard to pray on time but often gets lazy or tired. He sometimes uses Muslim apps for prayer times but not for azkar.
5. **Goals and Needs:** Needs motivational reminders, a way to track progress, and features that feel rewarding without pressure.
6. **Pain Points:** Finds it hard to stay consistent, especially with wudu and during Fajr/Isha. Is easily distracted.
7. **Technology Proficiency:** Average, uses apps but not into overly complicated things.
8. **Preferred Platforms:** Mobile
9. **Quote:** *“Sometimes I just need a nudge, something to keep me from falling off track.”*

User Persona 3: Huda

1. **Name:** Huda
2. **Age:** 21
3. **Occupation:** School Teacher
4. **Background:** Huda prays on time and uses her iPad for Quran and azkar. She prefers structured routines and values simplicity and reminders.
5. **Goals and Needs:** Wants to maintain her good habits, get reminders for Quran reading, and receive uplifting content like daily hadiths.
6. **Pain Points:** Sometimes she forgets where she left off in Quran, wishes apps were more intuitive and minimal.

7. **Technology Proficiency:** Above average, uses productivity and Islamic apps often.
8. **Preferred Platforms:** Tablet and mobile
9. **Quote:** *“I just want an app that makes it easier to keep up with everything, no distractions, just clarity.”*

“Based on the responses you got from the interview, create 3 short user stories for your project.”

User Story 1: Essam

As a university student struggling with motivation, **I want to** get personalized reminders and suggested duas, **so that** I stay spiritually connected even on lazy days.

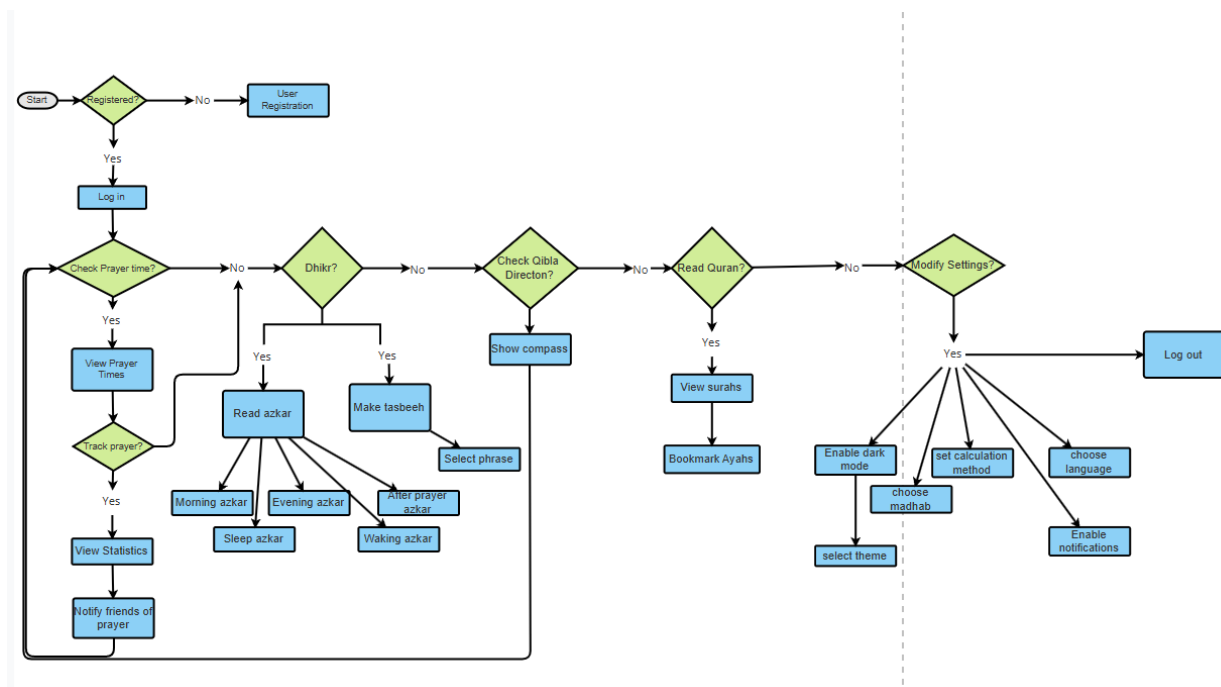

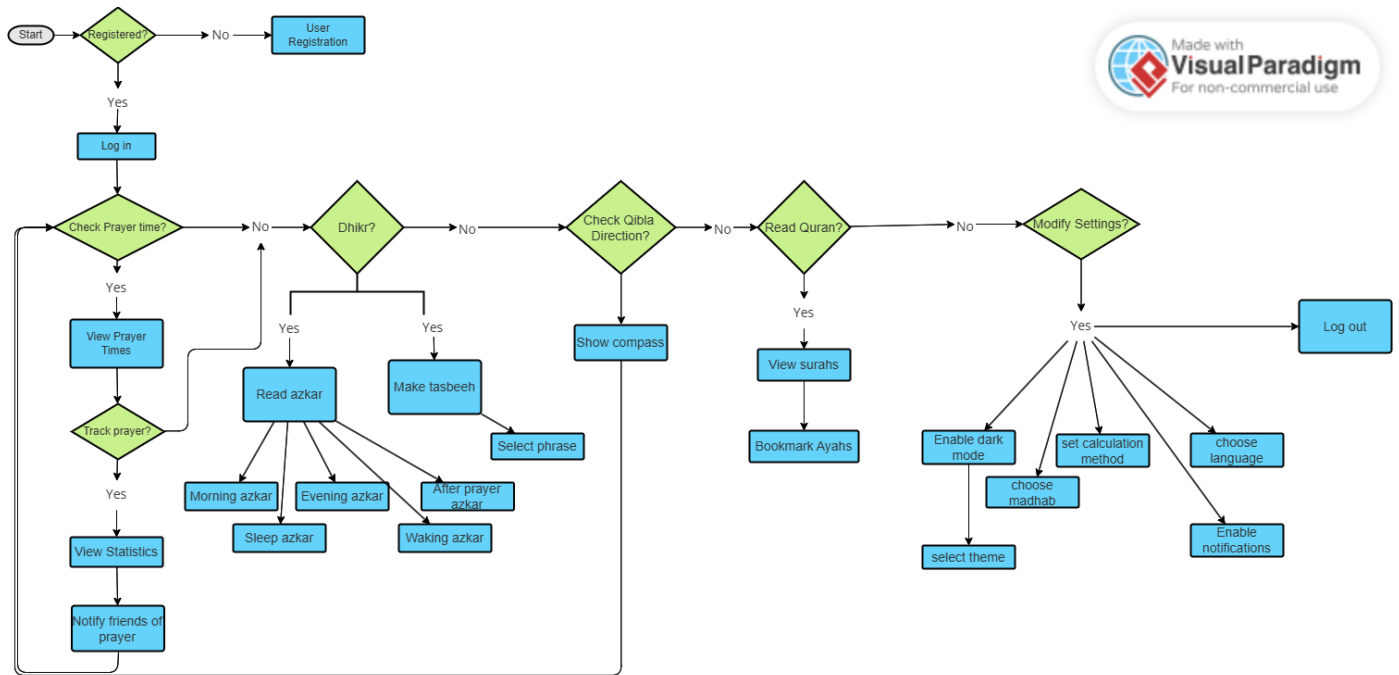

User Story 2 : Nidal

As a Muslim trying to build a consistent routine, **I want to** track my prayer and Quran habits, **so that** I can monitor my progress and feel encouraged.

User Story 3 : Huda

As a regular worshipper with a busy schedule, **I want to** receive daily hadiths and Quran bookmarks, **so that** I can stay consistent and not lose my place.

“Create the User Flow Diagram OR the User Flow Diagram Flowchart for your project showcasing the main functionalities of your product.”

Extra since we interviewed 4 persons:

User Persona 1: Mario

1. **Name:** Mario
2. **Age:** 21
3. **Occupation:** Engineer
4. **Background:** Mario is disciplined with his prayers and azkar. He prays on time, checks prayer times through an app (notifications don't work), makes tasbeeh after every prayer.
5. **Goals and Needs:** Wants to maintain his strong routine and enhance his experience with better reminders and a more functional azkar section.
6. **Pain Points:** Frustrated with lack of useful notifications; his app doesn't help with azkar or Quran.
7. **Technology Proficiency:** High, regularly uses Islamic apps
8. **Preferred Platforms:** Mobile phone
9. **Quote:** "I always check my phone for prayer times, I just wish it reminded me better and included azkar too."

User Story: Mario

As a consistent Muslim who prays and does azkar regularly, **I want to** receive reliable prayer time notifications and have easy access to azkar after each prayer, **so that** I can maintain my routine without needing to manually check the app every time.
